DESCRIPTION

TECHNICAL DETAILS

PRODUCT INFORMATION "REMOVE CLEANER - 10 ML"

Thermal Grizzly TG Remove is an acetone based nano-cleaner for the best cleaning results of thermal paste. In addition TG Remove has a degreasing effect which helps preparing the surface for new application e. g. on CPUs.

TG Remove was developed by Thermal Grizzly with the focus on removing thermal paste and residues in the most efficient way. The cleaner has deep cleansing properties which helps removing remaining conventional thermal paste but also liquid metal based thermal compounds such as Conductionaut.

The degreasing effect helps to prepare the surface for best liquid metal application.
